Kenny Baird was present to discuss the release of the letter of credit on Rolling Hills Estates (Subdivision). As there were a few minors problems, planning commission discuss the roads. The roads are to be 24 feet wide, 24 feet curb to curb on the inside and passable, with curbs added on it, it would be 25 feet wide, and this is residential only. Also, there is a small drainage problem. David Williams, with the State Planning Office, recommended another tile (no less than 12 inches) needs to be placed under the driveway to keep the flow of water going down to the main drainage area.
